

# Public Work's Meeting Minutes

September 3, 2015

In attendance – Mr. Ruse, Mrs. Eckel, Mr. Kolb, Mr. Scott

1. The ad hoc committee to review the RFQs for the State Route 65 repaving project and the intersection project at Dixie/Colony/River Road/Lime City selected Tetra Tech.
2. The committee discussed the potential additional cost for having MSG review the design of the intersection project and felt that it is an extra charge that is not necessary. We have chosen an excellent firm and have the expertise to review it in house.
3. The department will be using \$50,000 currently in their equipment budget to purchase a new F450 dump truck. A plow will be added to it. It will replace a 1999 utility truck with 125,000 miles on it.
4. The committee would like the engineer to look at connectivity of the sidewalks in the areas of the new bike path and new bridge on Lime City Road so that by the time those projects are complete, there are sidewalks (or a bike path) all the way from SR 65 to Buck Road.
