

Public Work's Meeting Minutes

October 12, 2015

In attendance – Mr. Ruse, Mrs. Eckel, Mr. Kolb, Mr. Scott

1. Committee discussed giving Tetra Tech the go ahead to get started on the State Route 65 repaving Design.
2. The committee discussed the need to have a civil service test and to prepare to hire. One employee will be retiring in 2016. Our numbers are very low now, there isn't enough time to get everything done that needs to be done and it is a safety hazard to do some of the work with such few people. The committee recommends that the administration go to the civil service commission and set up a test right away.
