

ZONING AND TECHNOLOGY

October 31, 2016

Attendees: Councilmen Marquette, Ruse and Staczek & Administrator Scott

The agenda for our meeting consisted of Technological up-grades to council's chamber. Attending council and committee meetings when maps and diagrams and other visual materials are being discussed, it is very hard for those in attendance to grasp what is being referenced. Mr. Scott has monies available to purchase 4 televisions, 3 in council chambers on cantilevered arm mounts and 1 in city halls vestibule. Mike is still getting quotes for all aspects of this project and feels very strong that these much needed upgrades would come in under his \$10,000.00 limit.

The committee voted unanimously to proceed.

Sincerely

Greg Marquette

Audio Visual Project for Council Chambers
